

# THEROS

## Transparency and trust in organic food supply chain & GI products

An integrated toolbox for improved verification and prevention of adulterations and non-compliances in organic and geographical indications food supply chain

Adulteration prevention of processed quality labelled food products

Adulteration prevention of fresh/bulk organic agri-commodities

Data driven business model for organic food fraud/adulteration prevention

Adulteration prevention of geographical indication food products

**THEROS aims to implement an integrated toolbox being capable to modernise the process of verifying organic and geographical indications food products. THEROS aims to prevent adulterations and non-compliances, through the use of various technological innovations and data sources, while demonstrating enhanced security, transparency and interoperability in the quality labelled food supply chain.**
