Project Overview

THEROS: An integrated toolbox for improved verification and prevention of adulterations and non-compliances in organic and geographical indications food supply chain

FOODTECH Novi Sad, 17th October 2024

Dimitra Tsiakou, I-SENSE Group, Greece (ICCS)
Elena Krikigianni, Seability, Greece (SEAB)
Svetlana Vitomirović, Organic Control System, Serbia (OCS)

THEROS Key Facts

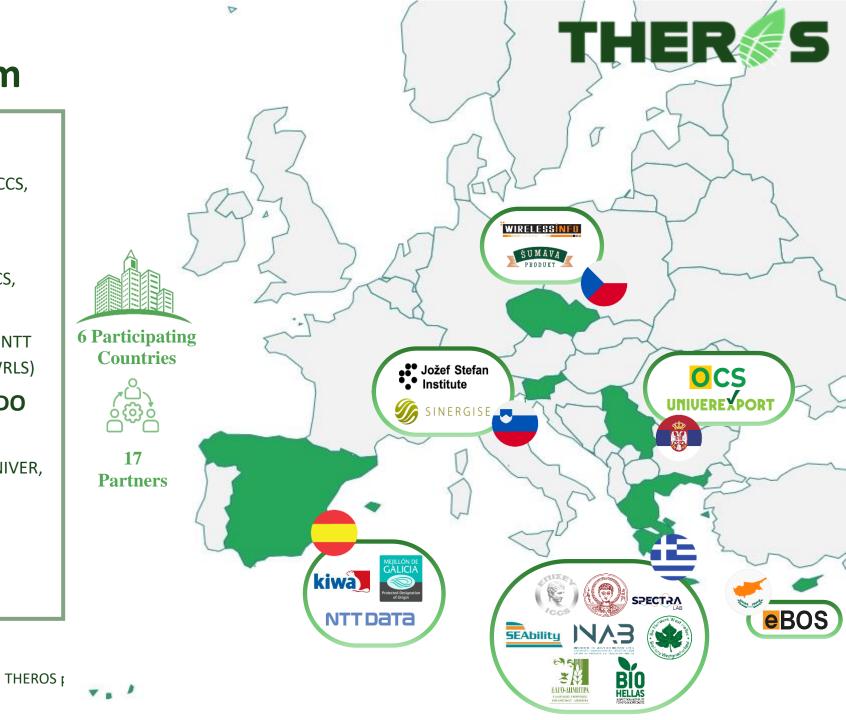

- Project Title: An integrated toolbox for improved verification and prevention of adulterations and non-compliances in organic and geographical indications food supply chain
- Call identifier: HORIZON-CL6-2022-FARM2FORK-01-04
- Topic: "Innovative solutions to prevent adulteration of food bearing quality labels: focus on organic food and geographical indications"
- **Duration: 01.01.2023 31.12.2025** (36 months)
- Funding scheme: IA Innovation Action
- **EU contribution:** EUR 3,999,961.00

Coordinated by: Institute of Communication and Computer Systems (ICCS), Greece

THEROS Consortium

- 4 Research Institutes &
 Technology Organizations (ICCS, AUTH, JSI, CERTH)
- 4 Control and Certification
 Bodies / Authorities (ELGO, OCS, KIWA, BIO-HELLAS)
- 5 Large Enterprises & SMEs (NTT DATA, SINERGISE, EBOS, SEABILITY, WRLS)
- 1 Regulatory Council for a PDO (MEXILLON)
- 2 Retailers / Wholesalers (UNIVER, SUMAVA)
- 1 Cooperative and Producer Association (BIO-NET)

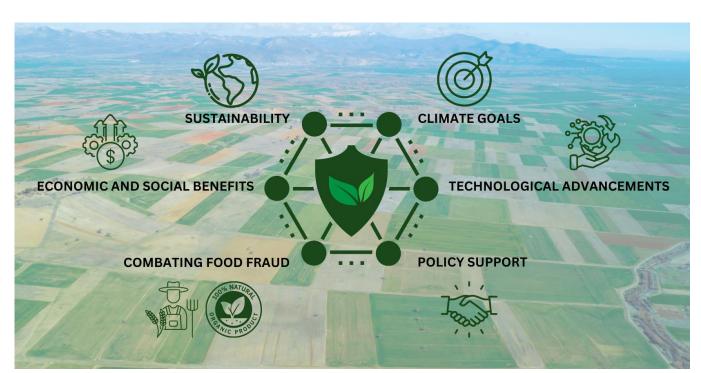

Motivation

- ✓ Sustainability and Climate Goals: Aim for a climate-neutral Europe by 2050 through sustainable food systems and eco-friendly farming.
- Combating Food Fraud: Prevent adulteration and fraud in high-value organic and GI foods to protect consumer trust and product integrity.
- ✓ Technological Advancements: Use digital technologies like blockchain and digital passports to improve traceability, integrity, and security in the food supply chain.
- Economic and Social Benefits: Support fair economic returns for local farmers, contribute to economic growth, and ensure safe, healthy, high-quality food for consumers.
- ✓ Policy Support and Consumer Confidence: Align with European Commission initiatives to enhance transparency and restore consumer confidence in organic trade.

Improve detection of adulterations and non-compliances in the organic and GI food products including efficient monitoring of quality and sustainability parameters through low-cost, digital & scalable solutions.

Enhance traceability in the quality labelled food supply chain via novel technologies and approaches that will **ensure secure** and transparent data governance across the whole value chain.

Ensure efficient management and **harmonization of data** collected from the different stages **of the supply chain**, enable their uptake **for improved decision making** and assure interoperability and integration with existing systems.

Assess and formulate **new business-oriented models** and approaches towards preventing quality labelled food adulteration as well as increasing awareness and **quality assurance**.

Validate and **demonstrate the effectiveness** of the THEROS integrated toolbox through **4 validation campaigns** that will pave the way for rapid uptake of the proposed **systemic innovations**.

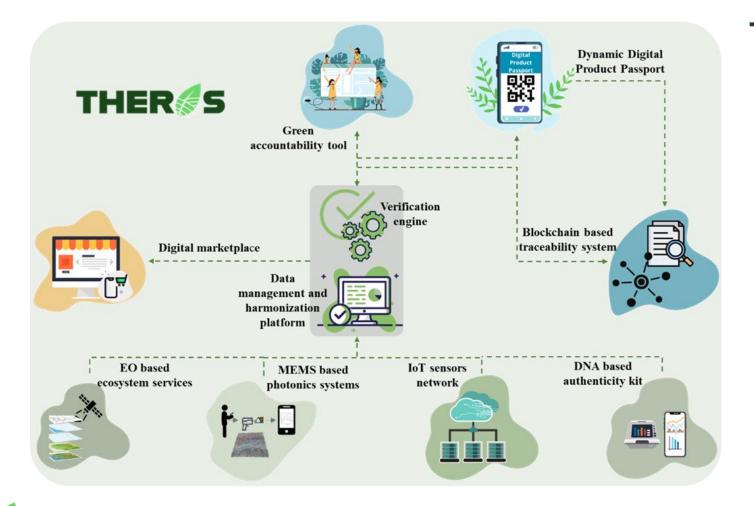

THEROS Vision & Concept

THEROS aims to implement an integrated toolbox being capable to modernize the process of verifying organic and geographical indications food products and preventing adulterations and non-compliances, while demonstrating enhanced traceability, security and transparency in the supply chain, through the use of various technologies and innovations

that leverage Earth Observation, photonics, internet of things (IoT), DNA metabarcoding, blockchain, digital interfaces and product passport, advance analytics, machine learning, artificial intelligence and business models.

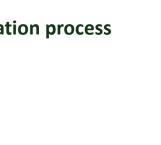

At the same time, efficient mechanisms will be employed in order to ensure interoperability with existing control systems, as well as improved accessibility and sharing of data through harmonized and standardized means, whilst also demonstrating their uptake by relevant stakeholders for improved decision-making.

If you're Food authority or Control/Certification Body

Funded by the European Union

If you're EC institution or Policy Maker

More accurate and reliable environmental impacts assessment

If you're a Supply Chain Actor

Reduce complexity in the organics and GIs supply chain

Ensure business logic towards addressing claims

Increase transparency, traceability, trust and security in the organics and GIs supply chain

If you're a Consumer

A game-changing innovation that will provide sustainability of organic farming systems and ensure rapid and cost-effective verification of organic and geographical indications food products
